

Part I – Fill in the Blank

Read each statement carefully. Fill in the blank with the correct answer from the word bank provided below. Write only the letter of your answer on the line provided.

1. _____ is a digital copy of an optical disc which has a single file that contains an exact copy of all the data and commonly used to install operating system, create bootable USB drives, or backup software.
2. _____ allows a computer to start an installation process even without an existing operating system.
3. _____ is a lightweight application used to create bootable drives from ISO files.
4. _____ is a unique identifier assigned to a device connected to a network.
5. An IPv4 is a _____ numerical address divided into four sections.
6. _____ is a number that is assigned to a network and represented by **1**.
7. _____ is the address that is assigned to a host which is represented by **0**.
8. _____ is a process of breaking down the large network into smaller network.
9. _____ is the unique name that identifies a computer on a network.
10. _____ serves as the exit point for devices when sending data outside their own network.
11. _____ translates domain names into IP addresses.
12. _____ is a centralized database that manages users, computers, and permissions.
13. _____ is any basic discrete device or physical entity in an electronic system used to affect electrons or their associated fields.

Word Bank

- A. RUFUS
- B. ELECTRONIC COMPONENTS
- C. 32-BIT
- D. BOOTABLE MEDIA
- E. SUBNETMASK
- F. HOST ADDRESS
- G. SUBNETTING
- H. IP ADDRESS
- I. NETWORK ADDRESS
- J. COMPUTER NAME
- K. ISO IMAGE
- L. DEFAULT GATEWAY
- M. DNS
- N. DHCP
- O. ADDS
- P. 64-BIT

No.	Answer	Letter
1	ISO IMAGE	K
2	BOOTABLE MEDIA	D
3	RUFUS	A
4	IP ADDRESS	H
5	32-BIT	C
6	SUBNETMASK	E
7	HOST ADDRESS	F
8	SUBNETTING	G
9	COMPUTER NAME	J
10	DEFAULT GATEWAY	L
11	DNS	M
12	ADDS	O
13	ELECTRONIC COMPONENTS	B

Part 2 – TRUE OR FALSE

Write TRUE if the statement is correct and FALSE if not.

1. 128.18.10.254 is a Class B IP address.
Answer: ☒ TRUE
2. A Class C IP address has a /24 CIDR notation.
Answer: ☒ TRUE
3. 192.168.1.1 has a 16-bit host.
Answer: ☒ FALSE
(It has an 8-bit host because it is a Class C address with a /24 subnet mask.)
4. A loopback address is used to test a local computer's network functions.
Answer: ☒ TRUE
5. Broadcasting to the same network will cause chaos and slow down the network because of a tremendous amount of broadcasts.
Answer: ☒ TRUE
6. Oracle is the virtual machine that we used to do a specific task in the system. (still slightly blurry)
Answer: ☒ FALSE
(Oracle is a company. Oracle VM VirtualBox is virtualization software, not the virtual machine itself.)
7. Passive electronic components are those that have gain or directionality.
Answer: ☒ FALSE
(Passive components do not provide gain.)
8. IC is an example of an active electronic component.
Answer: ☒ TRUE
9. Diode is a component that conducts electricity in only one direction.
Answer: ☒ TRUE
10. Inductive components are electrical components that use magnetism.
Answer: ☒ TRUE
11. A multimeter is an electronic instrument used to measure the three basic electrical characteristics: voltage, current, and resistance.
Answer: ☒ TRUE
12. Active components can make a weak electrical signal stronger or use one signal to control another.
Answer: ☒ TRUE
